Bilingual Systems Engineer and Senior Backend Engineer with 5+ years of experience designing and scaling high-availability systems and RESTful APIs. Proven expertise integrating Large Language Models (LLMs) and Generative AI capabilities into production environments. Strong background in cloud infrastructure, distributed systems, and the application of rigorous software architecture and testing standards. Adept at defining technical guidelines and building secure, efficient backend services for high-impact platforms.

WORK EXPERIENCE

Vista Higher Learning | Software Developer

Sep 2024 - present

- Led backend architecture for Google integrations, engineering secure OAuth, advanced error handling, and custom rate-limiting mechanisms.
- Accelerated Agile delivery by establishing custom AI (Claude) coding rules, enforcing TDD (RSpec), and leading rigorous PR reviews.
- Improved platform reliability by architecting multi-database Redis setups for Sidekiq and resolving critical client-facing support issues.

Cuatro Punto Cero | Full-Stack Developer

Feb 2023 - Jan 2025

- Engineered web and mobile applications for diverse clients, successfully driving up to a 70% increase in operational productivity.
- Built and scaled core features including secure Google Auth, real-time notifications, analytics, and asynchronous background jobs.
- Accelerated Agile (Scrum) delivery by leveraging AI tools, maintaining strict code quality and best practices through unit testing.

SquadraApp | Full-Stack Developer

Mar 2023 - Sep 2024

- Architected the core web platform for a startup, leading server migration to DigitalOcean and building automated CI/CD pipelines.
- Optimized database queries and engineered key features, including secure Google Auth and comprehensive data flow analytics.

Hogaru | Junior Developer

Oct 2021 - Feb 2023

- Developed and maintained core features, including Google API integrations, actively contributing to new product releases within a Scrum engineering team.
- Optimized production databases by analyzing and refactoring complex queries, significantly improving overall system performance and response times.
- Managed the technical support queue, diagnosing critical client-facing issues and deploying real-time hotfixes to maintain high platform reliability and customer satisfaction.

TECHNICAL SKILLS & LANGUAGES

- Core: Ruby on Rails, PostgreSQL, Redis, REST APIs, GenAI Integrations, React, Vue.js.
- DevOps & Tools: Docker, Kamal, AWS, Vercel, RSpec (TDD), Git, tmux, Cursor IDE.
- Skills: Asynchronous Communication, Architectural Decision-Making, Agile (Scrum/Kanban), Cross-functional Team Collaboration.
- Languages: Spanish (Native), English (B2 Professional Working Proficiency).
